

# Digital Health

Join the UK's largest Medtech cluster

## Opportunity

### Collaborate

Engage with UK-leading NHS clinicians in Primary and Secondary care to accelerate your product development in collaboration with them.

### Tech talent

Access 22 per cent of the UK's digital health talent pool. Key employers are NHS Digital, emiHealth and TPP, which manage between them over 90 per cent UK GP patient record (EHR) systems.

### NHS Digital

Develop and integrate your software platforms working closely with NHS Digital. NHS Digital is central to delivering the NHS Long-Term plan in terms of innovation and has pioneered the NHS App which is being launched to over 40 million patients in England during 2019.

### Data

Access datasets in the unique shared Leeds Care Record EHR system of 5.4 million patient records to better design cost-effective clinical trials. Work with the Leeds Teaching Hospital and Leeds Institute for Data Analytics to better target cohort health datasets.

### Artificial intelligence

Leeds is home to The Northern Pathology Imaging Collaborative (NPIC) centre of excellence: the NPIC aims to explore new ways of speeding up the diagnosis of diseases – including cancer – through the application of AI.

## Company insight

### Agfa Healthcare

- Leader in analogue, digital radiography and enterprise image systems for shared access across the NHS
- Developing new imaging techniques and integrating Augmented Intelligence for fast access to imaging

### TPP

- Leading shared healthcare software provider
- Used by over 200,000 clinicians in over 7,000 organisations
- Holds over 50 million patient records

### emiHealth

- Clinical software and services are used by over 80 per cent of NHS acute trusts
- Manages patient records and healthcare information systems in over 10,000 organisations

### Tunstall Healthcare

- Pioneer in digitally-connected healthcare in care homes for the elderly, including those with dementia and those with learning disabilities
- First company in the UK to develop alarm systems for older people
